Life Journey of a CIPET-ian: Success story

Mr. Ramesh B.E MECH ANNA UNIVERSITY, COMPUTER DIPLOMA, PGD PE. CIPET 1995, CHENNAI, MBA - NMIMS MUMBAI.

I was selected by campus at CIPET in 1995 by Engel Austria and trained.

In Engel Austria, after the training, I moved back to India, started as a service engineer, and within five years became a service manager.

During this time, the company was in big trouble and about to wind up the operation in India. I took over the company as country head, turned around the company from a loss, made it a profitable organisation within a year, and steered the company for another ten years.

I got an opportunity from a well-known Italian group for the Greenfield project in Ahmedabad. Successfully established the company for six years.

To fulfill my entrepreneurial urge, I started a joint venture company with the Izumi HPM Group from Honkong, which took over the 100-year-old American company HPM in the USA.

A humble start-up with 5 people and a 500-square-foot office became a 200-crore plus company in 5 years and recently built a state-of-the-art manufacturing facility of 2 lakhs sq. ft. with 850000 sq. ft. of land in Sanand Gidc with 200 employees, a tech Centre in Chennai, and sales offices all around India.

Within 5 years, we installed nearly 2500 machines in India, from 60 tons to 3000 tons.

I attribute my success journey to my professors at CIPET. CIPET is the one who taught us plastics, and the institute is more progressive, working like industry, which gives us knowledge not only in academics but also in practical work on live production.

Thanks for the spirit of CIPET, which created many entrepreneurs like me, and CIPETIANS are serving in the plastic industry globally.

Mr. Sundararajan BSc, PGDPPT 1998, MBA Journey of Resilience and Passion.

From being a shift engineer to founding Viswak Advance Polymers Pvt. Ltd., my journey has been fueled by unwavering passion, resilience, and a relentless pursuit of knowledge. It's a story of determination, grit, and setting ambitious goals, overcoming numerous challenges along the way.

Post Graduating from CIPET Mysore in 1998 marked the humble start of a remarkable journey. The foundation laid during those years became the cornerstone for what was to come, shaping the future of the plastics and polymers industry.

With a burning passion for innovation and a relentless pursuit of excellence, I embarked on the path of entrepreneurship, determined to carve a unique niche in the realm of plastics and polymers.

Establishing Viswak Advance Polymers Pvt. Ltd., wasn't just about founding a company; it was about creating a legacy. It aimed to redefine industry standards and set a benchmark for excellence.

16 years of learning, evolving, and persevering. It's a tale of milestones, challenges, and transformative leaps, all fueled by an unwavering vision and a strong business model.

Throughout the journey, upholding values of integrity, innovation, and commitment have been the guiding forces, ensuring that every step aligns with the company's ethos and vision.

The future holds the promise of even greater impact, breakthroughs, and contributions to the Process, Technology engineering plastics and polymers industry, driven by an unwavering commitment to excellence and innovation.

The journey from being a shift engineer to becoming a leader in the plastics and polymers industry has been defined by unwavering passion, resilience, and a strong vision. It's a testament to perseverance, commitment, and unyielding determination.
